Education

Northwestern University
Full-Stack Web Development
Coding Boot Camp
~
Ohio University
Bachelor of Science
Human and Consumer Sciences

Professional Summary

I am a full stack web developer who currently helps manage over 90 bespoke WordPress websites, three development environments, and the underlying networking infrastructure. Currently, I consult with partners and stakeholders, design and develop new web sites, perform site updates and maintenance, as well as help design new concepts and rebrands. I also manage the AWS environment and resources at my organization. My business acumen and communication skills, coupled with my passion for technology, forward thinking, and technical abilities have been the driving forces in my professional growth.

Experience

Full Stack Web Developer — **Lettuce Entertain You**
April 2019 – Current — **Chicago, Illinois**

- Collaborate with and deliver project presentations to C-level, Market Managers, and Equity Partners to design, develop, maintain, update, and host over 90 WordPress sites using Amazon Web Services Cloud technologies
- Manage, create, and adhere to project budgets, deadlines, and technical requirements
- Conduct site audits for performance, SEO, ADA compliance, and best practices using software tools like Google Analytics, Lighthouse, and Site Improve
- Manage the AWS cloud architecture. Responsible for reducing spending, improving performance, and exploring ways to implement ML for data processing

Teaching Assistant/Tutor – Web Development — **Trilogy Education**
December 2018 – May 2019 — **Remote**

- Conducted student code reviews, analysis, and optimization
- Taught best practices and methodologies to problem solve, search for resources, and better understand documentation
- Coached students through complex problems using mechanisms to help them describe and fully understand the task/code at hand

Branch Manager/Sales Consultant — **Enterprise Holdings**
February 2013 – June 2018 — **Chicago, Illinois**

- Oversaw operations of multiple locations, including O'Hare International Airport where I supervised nearly 125 full time and part time employee
- Strong analytical skills - created new strategies focusing on client retention, referral metrics, sales pipelines using Salesforce
- Led product presentations and post-sale follow-ups

Professional Accomplishments

- Helped develop the CI/CD methodology and versioning policy using Bitbucket between development, staging, and production environments
- Helped develop the UI for a ticketing system for our customers to submit update and maintenance requests by integrating Jira, Bitbucket, and Slack
- Project Manager/Developer/Designer for three website builds: Tucci Italian, Aba Restaurants, and one currently unreleased concept
